

Arena

Design: Dag Hjelle, 2000

LK H

Arena

Arena combines timeless design with carefully engineered cushions for a supportive, relaxed sitting experience.

Technical information:

Designer Dag Hjellev drew inspiration from wheelchair cushions when developing Arena's unique cushioning. Multiple layers of foam are carefully combined to encourage an optimal sitting position. The rear section of the cushion is softer, allowing the pelvis to gently sink in while supporting the lower back. This provides a naturally balanced posture without requiring the body to constantly engage muscles to stay upright. Removable covers on the seat- and back cushions makes cleaning easy.

Configurations:

With a variety of configurations available, like different armrests and legs, you can tailor Arena to create your ideal sofa. Choose between a wide range of textile and leathers.

Armrests

All armrests is delivered with foam armrest cushion.

7 cm

14 cm

24 cm

Legs

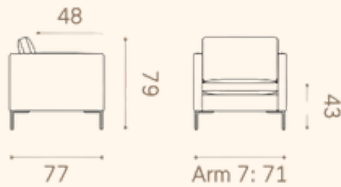

Legs, except the angular leg, are available in two heights: 15 cm and 18 cm, providing two seating heights: 42 cm and 45 cm.
