

Less

Design: Lars Tornøe, 2023

LK H

Less

Less has a sturdy wooden base and relaxed cushions, combining functionality with a laid-back expression. The wooden frame forms the 'backbone' of the sofa, both aesthetically and functionally. Visible from every angle, it creates a clear architectural base for the soft cushions, with all other components securely attached to this central structure.

Technical information:

Circular design principles:

Less is designed to last, be repaired and renewed. Every component can easily be replaced at home.

- No glue or staples.
- Removable covers for easy cleaning and maintenance.
- Delivered flat-packed for easy transportation.
