

Gaia

Design: Andreas Engesvik, 2025

LK H

Gaia

Gaia was born from the idea of “soft stone” – a quiet, sculptural sofa with a calm and inviting presence from every angle. Designed to stand freely in a room, it’s a social sofa that invites conversation and togetherness.

Circular design

Every choice in Gaia’s development was guided by environmental care. The result is a sofa easy to maintain, that can be repaired, renewed, reused, and ultimately recycled.

Key design principles:

- Understandable construction - easy to assemble and disassemble
- Removable cover for easy renewal
- Lightweight and modular - simple to move, clean, and transport
- No glue between materials
- Minimal material use, no harmful substances
- Replaceable parts and repairable structure
- Recyclable components - steel, wood, and springs can all be separated and reused

Technical information:

Width: 238 cm

Depth: 96 cm

Height: 67 cm

Seating height: 38 cm

Available in a wide range of fabrics.

Not available in leather.

Legs in polished steel.
